

Download File PDF Kidde Carbon Monoxide Alarm Manual Book

#Jenny

Finally I get this ebook, thanks for all these I can get now!

#Rio

Cool! I'am really happy

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

#Hun Tsu

wtf this great ebook for free?!

#Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

Intelligent Alarm
Battery Operated Combination
Carbon Monoxide, Fire & Smoke Alarm
Part Number 900-0216 Model KN-COSM-XTR-B

Description
The Kidde KN-COSM-XTR uses breakthrough technology to offer a fast response to fire, smoke, carbon monoxide, and gas leakage, as well as protect you from carbon monoxide and eventually reduce the chance of nuisance alarms. In addition, the Intelligent Alarm contains a voice warning that clearly states the present danger - smoke or carbon monoxide - and announces "Batteries Low" or "Replace Carbon Monoxide". The Intelligent Alarm contains the distinctive capabilities of an ionization smoke sensor - which is now being to detect smoke, the photo eye sensor, has been enhanced by being teamed with that of an electrochemical sensor, which is used to detect CO. These sensors respond to carbon monoxide, smoke, and high carbon monoxide levels. In the event of a low battery, the alarm will adjust its sensitivity in order to better discriminate between the hazard and false alarm. The integrated carbon monoxide sensor for the alarm is tested periodically at all times, and significantly reduces the potential for nuisance alarms.

Alarm Warnings
The Intelligent Alarm has been accompanied by three long tones followed by a verbal warning message "Batteries Low". The alarm will continue to sound until the batteries are replaced. **Carbon Monoxide** - Four short tones followed by a verbal warning "Carbon Monoxide". This continues until the unit is reset or the CO is eliminated.
Low Battery - One chirp followed by warning "LOW BATTERY". The red LED light will flash. This pattern will continue every minute for the first hour. After the first hour the red LED light will flash every minute accompanied by the chirp signal. The "LOW BATTERY" warning will only sound once every fifteen minutes.

Voice Flash Indication - "ALARM ACTIVATED" and "HIGH ALERT" voice announcement.
Peak Level Memory - If the alarm had detected a CO level of 30ppm or higher, the unit will announce "CO PERSISTENTLY DETECTED" for seven of the CO incident, when the "BackRest" feature is enabled.
Features and Benefits
• **Voice Alarm** - Announces the hazard type detected directly leading to "Reset" as the correct reaction to the hazard detected. Alarm announcement "Warning Carbon Monoxide" when a CO hazard is detected.
• **Combination Carbon Monoxide and Smoke Alarm** - A single unit can be installed where previously, two were needed. Reduced installation time and helps to keep home décor attractive.
• **BackRest Feature** - Tests alarm circuitry and triggers the voice announcement.
• **LEDs** - Two LEDs are provided. Flashing green for normal operation and flashing red for alarm condition.
• **Low Battery Warning** - The unit warns of a low battery condition by announcing "Low Battery" and by initiating an alarm chirp and activating a flashing red LED.
• **Battery Protected** - Provides protection even during power outages.
• **Battery Subpanel** - Shields the unit and provides an additional level of protection without further installation.
• **Reset Feature** - Temporarily silences nuisance alarms.
